Thamires Azevedo

Senior QA Engineer | Senior QA Analyst

Automated and Manual Testing | Cypress | Playwright | JavaScript | API Testing

Specialized in quality for financial products (fintech), open to digital products in any industry.

Available immediately (Open to work). Senior QA roles: remote worldwide, or on-site/hybrid in Recife, Brazil.

Recife, Brazil | azevedothamirest@gmail.com | linkedin.com/in/qathamiresazevedo | **Portfolio: azevedothamirest.github.io**

PROFESSIONAL SUMMARY

Senior QA Engineer with 7 years of experience in software quality assurance, 5 of them in financial products (fintech), promoted twice internally from Junior to Senior. I work from requirements analysis to post-deploy monitoring, with manual and automated testing: functional, exploratory, regression, E2E (end-to-end) and UAT testing; test automation with **Cypress, Playwright and JavaScript**, plus working knowledge of **Java and Ruby**; **REST API testing with Postman and SoapUI**; contract and messaging tests integrated into **CI/CD**; **BDD/Gherkin** scenarios. **ISTQB CTFL** and **ANBIMA CPA** certified, I validate system behavior against business rules. I apply **AI in the QA workflow** to speed up documentation, scenarios and analysis, always with critical review.

SKILLS

- **Test automation:** Cypress, Playwright, JavaScript, Java, Ruby, Selenium, E2E (end-to-end) testing, automated regression
- **API and integration testing:** REST API, Postman, SoapUI, contract testing, messaging, integration tests in CI/CD
- **Manual testing:** functional, non-functional, exploratory, regression, integration, UAT, performance
- **Test management:** TestRail, Xray, Jira, Trello, Azure DevOps, TFS
- **Data and version control:** SQL, Git, GitHub
- **Practices and methods:** BDD/Gherkin, Scrum, Agile, quality metrics, AI applied to QA

PROFESSIONAL EXPERIENCE

Senior QA Analyst | Grafeno

Jan 2021 - Oct 2026

Digital financial solutions fintech | São Paulo, Brazil | Remote

Senior QA Analyst (Sep 2025 - Oct 2026) | **Mid-level QA Analyst** (Dec 2022 - Sep 2025) | **Junior QA Analyst III** (Jan 2021 - Dec 2022)

- Structured and evolved the automated E2E regression suite of a financial products squad, redesigning **50+ Cypress scenarios** and achieving greater suite stability.
- Took part in **migrating an entire project to Playwright**.
- Expanded coverage to exception flows and breaking points, **reducing false positives** and increasing the team's confidence in the suite.
- Integrated tests into the **CI/CD pipeline** and tested **API contracts** and **asynchronous messaging flows**.
- Standardized test case naming and defined analysis criteria for critical bugs, improving traceability and QA process maturity.
- Created documentation used by QA, Product and Development, reducing ambiguity and rework across teams.
- Built **quality metrics dashboards** to support the team's analyses.
- Applied AI in the QA routine (test scripts, Gherkin scenarios, bug reports), gaining speed without sacrificing critical review.
- Modeled functional and non-functional test cases in BDD/Gherkin, bringing QA, Development and Product closer together.
- Business reference for other squads on rules, contracts and platform behavior; supported scenario reviews for less experienced QAs.

Technologies: Cypress, Playwright, JavaScript, Postman, SQL, TestRail, GitHub, CI/CD, BDD/Gherkin

PROFESSIONAL EXPERIENCE (CONTINUED)

Test Analyst / QA Analyst | Accenture

Feb 2019 - Jan 2021

Global technology consultancy | Recife, Brazil

- Executed functional, non-functional, regression, integration, UAT and performance testing on financial systems.
- Created automation scripts via Xshell to optimize repetitive test runs.
- Used SQL for bulk data validation during test execution.
- Managed bugs and evidence via TFS, with direct stakeholder interaction.
- Provided consultative support identifying quality gaps and proposing improvements.

Technologies: TFS, Xshell, SQL, SoapUI

PROJECTS

QA Scout | Web app for exploratory testing

Personal open-source project: organizes the exploratory testing session, records observations and delivers a ready-made report at the end.

Technologies: JavaScript, Playwright, GitHub Actions

QA Pulse | Internal project · Grafeno

Dashboard that gathered the team's quality indicators from Jira to support day-to-day decisions. Built during my daily work as a QA; internal tool owned by Grafeno.

Technologies: Jira

QA Sidekick | Internal project · Grafeno

AI assistant that supported delivery analysis and the writing of test cases and bugs, always reviewed by the QA. Built during my daily work as a QA; internal tool owned by Grafeno.

Technologies: AI applied to QA, Jira

EDUCATION

Postgraduate Degree in Software Quality Engineering | Centro Universitário Senac | 2023 - 2024

Bachelor's Degree in Information Systems | UNINASSAU | 2018 - 2021 | Software Testing Mentor

CERTIFICATIONS

- **CTFL:** Certified Tester Foundation Level (ISTQB)
- **CPA:** ANBIMA Professional Certificate
- **SFPC:** Scrum Foundation Professional Certificate
- **DEPC:** DevOps Essentials Professional Certificate
- **Lean Six Sigma White Belt**
- **LGPD:** Brazilian General Data Protection Law

Available immediately. See my projects in the portfolio: **azevedothamirest.github.io**
