# Thamires Azevedo

## Senior QA | QA Engineer

Automated and Manual Testing | Cypress | Playwright | JavaScript | API Testing

Specialist in financial product quality (fintech), open to digital products in any industry.

**Available immediately (Open to work).** Senior QA roles: on-site or hybrid in Recife (Brazil), or fully remote worldwide.

Recife, Brazil | +55 (81) 98909-8222 | azevedothamirest@gmail.com | linkedin.com/in/qathamiresazevedo | **Portfolio: azevedothamirest.github.io**

## PROFESSIONAL SUMMARY

Senior QA Engineer with 7 years of experience in software quality assurance, 5 of them in financial products (fintech), promoted twice internally from Junior to Senior. **First QA hire at Grafeno**: built the quality process and onboarded every QA who joined afterwards. I work from requirements analysis to post-deploy, with manual and automated testing; automation with **Cypress, Playwright and JavaScript**, plus working knowledge of **Java and Ruby**; **REST API testing with Postman and SoapUI**; contract and messaging tests integrated into **CI/CD**; **BDD/Gherkin** scenarios. Strong banking domain knowledge, including **CNAB files**. Certified **CTFL (ISTQB)** and **ANBIMA CPA**. I use **AI for QA** to speed up documentation, scenarios and analysis, always with critical review.

## SKILLS

- **Test automation:** Cypress, Playwright, JavaScript, Java, Ruby, Selenium, E2E (end-to-end) testing, automated regression
- **API and integration testing:** REST APIs, Postman, SoapUI, contract testing, messaging, CI/CD integrated tests
- **Manual testing:** functional, non-functional, exploratory, regression, integration, UAT, performance
- **Business domain:** financial products, banking, CNAB files
- **Test management:** TestRail, Xray, Jira, Trello, Azure DevOps, TFS
- **Data and version control:** SQL, Git, GitHub, GitHub Actions
- **Practices and methods:** BDD/Gherkin, Scrum, agile, quality metrics, AI for QA

## PROFESSIONAL EXPERIENCE

### Senior QA Analyst | Grafeno

Jan/2021 - Oct/2026

Digital financial solutions fintech | São Paulo, Brazil | Remote

**Senior QA Analyst** (Sep/2025 - Oct/2026) | **Mid-level QA** (Dec/2022 - Sep/2025) | **Junior QA III** (Jan/2021 - Dec/2022)

| | | | |
|---|---|---|---|
| **75% → 32%** yearly rework (−57%) | **28 → 5** critical bugs in production (−82%) | **29% → 13%** bugs per delivery (−55%) | **3h → 30 min** regression time (−83%) |

- Built and evolved a squad's automated E2E regression, redesigning **50+ Cypress scenarios** and cutting regression time from **3h to 30 min**.
- Brought quality into refinement and the backlog, reducing **rework from ~75% to ~32%** within a year.
- Defined critical-bug criteria with Product and Engineering, reducing **critical bugs in production from ~28 to ~5**.
- Took part in **migrating an entire project to Playwright**.
- Integrated tests into the **CI/CD pipeline** and tested **API contracts and asynchronous messaging flows**.
- **First QA at the company:** documented business rules and processes used by QA, Product and Engineering, and **onboarded every QA** who joined later.
- Worked across **about 6 squads** in the ecosystem as a business reference for rules, contracts and platform behavior.
- Standardized test case naming, modeled BDD/Gherkin scenarios and built **quality metrics dashboards**.
- Applied AI to the QA routine (test scripts, Gherkin scenarios, bug reports), always with critical review.

`Technologies: Cypress, Playwright, JavaScript, Postman, SQL, TestRail, GitHub, CI/CD, BDD/Gherkin`

## PROFESSIONAL EXPERIENCE (CONTINUED)

### Test Analyst / QA | Accenture
Feb/2019 - Jan/2021

Global technology consulting | Recife, Brazil

- Functional, non-functional, regression, integration, UAT and performance testing of financial systems.
- Automation scripts via Xshell to streamline repetitive executions.
- Bulk data validation with SQL during test runs.
- Bug and evidence management in TFS, working directly with stakeholders.
- Consultative support in identifying quality gaps and proposing improvements.

Technologies: TFS, Xshell, SQL, SoapUI

## PROJECTS

### QA Scout | AI-assisted exploratory testing
open source

Chrome Web Store extension that organizes the exploratory session (charter, 18 heuristics, debriefing) and outputs a Jira-ready bug report. **85 Playwright E2E tests** (desktop, mobile and the real extension), with ~12 critical tests blocking merges in CI; 4 languages; MCP server where AI drives the session.

Technologies: JavaScript, Playwright, GitHub Actions

### QA Pulse | Internal project · Grafeno

Dashboard that gathered the team's quality indicators from Jira to support day-to-day decisions. Internal tool owned by Grafeno.

Technologies: Jira

### QA Sidekick | Internal project · Grafeno

AI assistant that supported delivery analysis and writing test cases and bug reports, always reviewed by QA. Internal tool owned by Grafeno.

Technologies: AI for QA, Jira

## EDUCATION

### Postgraduate Degree in Software Quality Engineering
2023 - 2024

Centro Universitário Senac

### Bachelor's Degree in Information Systems
2018 - 2021

UNINASSAU | Software Testing Mentor

## CERTIFICATIONS

- **CTFL:** Certified Tester Foundation Level (ISTQB)
- **CPA:** ANBIMA Professional Certificate (Brazilian financial markets)
- **SFPC:** Scrum Foundation Professional Certificate
- **DEPC:** DevOps Essentials Professional Certificate
- **Lean Six Sigma White Belt**
- **LGPD:** Brazilian General Data Protection Law

## LANGUAGES

- **Portuguese:** native
- **English:** upper-intermediate (B2)
