SENIOR QA ENGINEER

Open to work

# Thamires Azevedo

Senior QA Engineer | Automated and Manual Testing · Cypress · Playwright · JavaScript · API Testing

Specialized in financial products, open to digital products in any industry.

Quality that understands the business rule, not just the requirement.

**Actively looking for a new opportunity** — available as a Senior QA: remote worldwide, or on-site/hybrid in Recife, Brazil.

Portfolio: azevedothamirest.github.io →

**7 years**
in QA, 5 in fintech

**Junior → Senior**
2 internal promotions

**50+**
Cypress scenarios redesigned

**CTFL + CPA**
technical + business

## PROFESSIONAL SUMMARY

Senior QA Engineer with 7 years of experience in software quality, the last 5 in financial products (fintech), my main specialty. QA fundamentals are the same in any digital product: I work from requirements analysis to post-deploy monitoring, with manual and automated testing side by side: functional, exploratory, regression and UAT testing; test automation with **Cypress, Playwright and JavaScript**; API testing with **Postman**; **BDD/Gherkin** scenarios. I learn each product's domain fast — in finance, I earned the **ANBIMA CPA** certification — to validate behavior against business rules. I apply **AI in the QA workflow** to speed up documentation, scenarios and analysis, always with critical review.

## PROFESSIONAL EXPERIENCE

### Senior QA Analyst — Grafeno

2021 – Oct 2026

Digital financial solutions fintech · São Paulo, Brazil · Remote

**Senior QA Analyst** (2025–2026) · **Mid-level QA** (2022–2025) · **QA Analyst III** (2021–2022)

- Structured and evolved the automated regression suite of a financial products squad, redesigning **50+ Cypress scenarios** and achieving greater suite stability.
- Expanded coverage to exception flows and breaking points, **reducing false positives** and increasing the team's confidence in the suite.
- Integrated tests into the **CI/CD pipeline** and tested **API contracts** and **asynchronous messaging flows**.
- Standardized test case naming and defined analysis criteria for critical bugs, improving traceability and QA process maturity.
- Created documentation used by QA, Product and Development, reducing ambiguity and rework across teams.
- Built **quality metrics dashboards** to support the team's analyses.
- Applied AI in the QA routine (test scripts, Gherkin scenarios, bug reports), gaining speed without sacrificing critical review.
- Modeled functional and non-functional test cases in BDD/Gherkin, bringing QA, Development and Product closer together.
- Business reference for other squads on rules, contracts and platform behavior; supported scenario reviews for less experienced QAs.

Technologies: Cypress, Playwright, JavaScript, Postman, SQL, TestRail, GitHub, CI/CD, BDD/Gherkin

## PROFESSIONAL EXPERIENCE (CONT.)

### Test Analyst / QA — Accenture

2019 – 2021

Global technology consultancy · Recife, Brazil

- Executed functional, non-functional, regression, integration, UAT and performance testing on financial systems.
- Created automation scripts via Xshell to optimize repetitive test runs.
- Used SQL for bulk data validation during test execution.
- Managed bugs and evidence via TFS, with direct stakeholder interaction.
- Provided consultative support identifying quality gaps and proposing improvements.

Technologies: TFS, Xshell, SQL, SoapUI

## PROJECTS

01 · DASHBOARD

### QA Pulse

Connects to Jira and turns issues into quality indicators per team (rejection rate, escaped bugs, score), with 13 insight rules, PDF reports and 101 automated tests.

Node.js · Express · SQLite · OAuth 2.0

02 · QA ASSISTANT

### QA Sidekick

Reads a Jira delivery like an experienced QA, builds the test plan and writes bugs in the team's standard, asking for confirmation before writing. 11 commands, 29 automated tests.

Claude Code · Node.js · Jira REST API · BDD/Gherkin

## SKILLS

**Test automation:** Cypress, Playwright, JavaScript, Selenium

**API and integration testing:** Postman, SoapUI, contract testing, messaging, integration tests in CI/CD

**Manual testing:** functional, exploratory, regression, integration, UAT

**Test management:** TestRail, Xray, Jira, Azure DevOps, TFS

**Data and version control:** SQL, Git, GitHub

**Practices and methods:** BDD/Gherkin, Scrum, Agile, quality metrics, AI applied to QA

## EDUCATION

**Postgraduate Degree in Software Quality Engineering**
Centro Universitário Senac · 2023–2024

**Bachelor's Degree in Information Systems**
UNINASSAU · 2018–2021 · Software Testing Mentor

## CERTIFICATIONS

- **CTFL** — Certified Tester Foundation Level (ISTQB)
- **CPA** — ANBIMA Professional Certificate
- SFPC — Scrum Foundation Professional Certificate
- DEPC — DevOps Essentials Professional Certificate
- Lean Six Sigma White Belt
- LGPD — Brazilian General Data Protection Law
